

During my career, I have gained over 20 years of experience in the electronics industry in South Australia. My experience has given me a strong background in general engineering management and project management that has included business unit strategic planning, process improvement, team building, IP management, customer service and successful project delivery.

My experience has included practical lessons that have reinforced in me, a strong commitment to developing and working with teams to deliver quality, customer focussed products and services in a commercial context. With Adelaide Interim, I look forward to working with others to assist in team management as well as providing practical assistance in business planning and support.
