

Over the past 11 years I have successfully carried out a wide range of roles in many and various software development projects in Australia. My experience spans from technical implementation to management, having filled the roles of Software Developer, Team Leader, Site Coordinator, Senior Software Engineer and Assistant to the CEO.

My strong technical experience helps me perform effectively in designing and developing software systems. I've been responsible for implementing customer requirements, managing system networks / servers, leading and coordinating development teams, scheduling / estimating software projects as well as negotiating and tendering for contracts. I have managed contracts & teams while handling customer relationships and site facilities. I have also initiated "Tech Talks" to encourage Knowledge Sharing, process improvement, participated in interview panels and been a member of CMMI (Class A) appraisal teams.

## ROLES HELD

- Team Leader / Senior Software Engineer**  
Move IT
- Team Leader / Senior Software Engineer**  
Ebor Computing
- Executive Officer**  
Ebor Computing
- Site Coordinator / Software Engineer**  
Ebor Computing, DSTO, Edinburgh, SA Site
- Analyst / Programmer**  
Ebor Computing, DSTO, Rockingham, WA site
- Analyst / Programmer**  
Ebor Computing, DSTO, Edinburgh, SA site

## TECHNICAL SKILLS

- Languages**  
Java, C++, C, C#, Visual Basic, SQL, JavaScript, VBA, JSP, XSL
- Web Related Technologies**  
XML, HTML, CSS, GWT, Java Applets, J2EE, Web Works
- Databases**  
MySQL, Microsoft Access, Versant
- Architectures/API**  
JDBC, RMI, JMF, JNI, JPA, JCE, CORBA, HLA, JAXB, Selenium
- Development Tools**  
CVS, SVN, ANT, JUnit, Eclipse, IntelliJ
- Software Packages**  
Office Tools, GIMP, Inkscape, VMWare, Trac, DOORS, Asterisk, Nagios, Cacti
- Operating Systems**  
Linux, Windows

## COMPANIES

- Ebor Computing**  
creates high quality scientific and technical software solutions and specialist hardware systems for Defence, Government and Commercial clients
- Move IT**  
provides a web-based Online Delivery and Carrier management software service that interfaces with, and extends the power of, existing computer systems

## EDUCATION & TRAINING

- Bachelor of Computer and Information Science**  
University of South Australia, 1998
- Object Oriented Analysis & Design using UML**  
Object Training, Melbourne, 2009
- Java University/Java One**  
Sun Microsystems, San Francisco, 2008
- Inside GPS Receiver Hardware**  
Adelaide, 2005
- Defence Facility Security Officer Workshop**  
Defence Security Authority, Adelaide, 2003
- Management Skills Seminar**  
Skill Paths Seminars, Adelaide, 2003
- Introduction to the CMMI**  
Software Quality Institute, Brisbane, 2002
